Your website is live.
Now it's your turn.

Your website is ready and working. To help it show up on Google and bring in customers, a few steps need to be done **by you, the business owner**, because they require your login and your confirmation. It takes about 1 hour in total, and everything here is free.

Before you start, write down your details

Use **exactly the same details** everywhere (Google, social media and listings). Google trusts businesses whose information matches across the web.

Website address: _____

Business name: _____

Phone: _____

Address or cities served: _____

Business hours: _____

1 Add your website link to your social media

10 MINUTES

Instagram:

1. Open your profile and tap **Edit profile**.
2. Tap **Links** → **Add external link**.
3. Paste your website address, add a title (e.g. "Website") and tap **Done**.

Facebook: on your page, tap **Edit details** → **Website** → paste the address → **Save**.

WhatsApp Business: Settings → **Business tools** → **Business profile** → **Website** → paste the address → **Save**.

2 Create or complete your Google Business Profile

30 MINUTES + GOOGLE VERIFICATION

This is the box that shows up on Google Search and Google Maps when someone looks for your service. It is the step that brings in the most customers.

1. Go to **business.google.com** and sign in with your Google account.
2. Search for your business name. If it already shows up, click **Claim this business**. If not, click **Add your business**.
3. Choose your **primary category** (PineWeb will tell you which one) and add extra categories.
4. If customers come to you, add your address. If you go to the customer, choose **service areas** and add the cities.
5. Fill in your **phone**, **website** and **hours**.
6. For the **description**, use the text PineWeb sends you.
7. Add **real photos**: logo, storefront or vehicle, finished jobs and team (only with permission from people in them).
8. Complete the **verification** Google asks for (video, phone call, text or postcard). Without it, your profile won't show up.

3 Ask real customers for reviews

5 MINUTES A WEEK

1. Search for your business name on Google while signed in.
2. On your profile, tap **Ask for reviews** and copy the link.
3. Send the link to happy customers by text or WhatsApp right after the job.

> *"Hi [name]! Thank you for choosing us. If you have a minute, a Google review would really help our small business: [link]"*

Reply to **every** review, including negative ones, politely and within a few days.

> **Never** buy reviews, ask friends to make them up, or offer discounts in exchange. This is against Google's rules and can get your profile removed.

4 Create other free listings

30 MINUTES

- **Bing Places** (bingplaces.com): sign in and choose **import from Google**. It copies your whole profile.
- **Apple Business Connect** (businessconnect.apple.com): puts your business on Apple Maps for iPhone users.
- **Yelp for Business** (biz.yelp.com) and **Nextdoor** (business.nextdoor.com): very popular for local services in the US.
- **Facebook page** with the same details and your website link.

Always use the same details you wrote down at the start.

5 Keep everything up to date

WHENEVER SOMETHING CHANGES

- New phone, hours or address? Update Google and your social media, and let PineWeb know so we update your website.
- Post a new job photo on your Google profile **once a month**.
- Once your Google profile is verified, send the link to PineWeb so we can connect it to your website.

Checklist

- [ ] Website link on Instagram, Facebook and WhatsApp
- [ ] Google Business Profile created, complete and verified
- [ ] Google profile link sent to PineWeb
- [ ] First customer reviews requested
- [ ] Bing Places, Apple Business Connect, Yelp and Nextdoor done
- [ ] One new photo on Google every month

No one can guarantee the top spot on Google. Following these steps greatly improves the chances that your business shows up for people looking for your service. Results usually start to appear within a few weeks.
